Learning Objectives for Participants

At the conclusion of this seminar, the participant should be better able to:

1. Identify and initiate management of critically ill infants and neonates presenting with high-risk or nonspecific symptoms.
2. Evaluate and manage common pediatric neurologic emergencies, including seizures, altered mental status, and head injury.
3. Recognize and treat acute pediatric respiratory and intra-abdominal emergencies using evidence-based emergency protocols.
4. Assess and safely respond to pediatric behavioral health emergencies in the emergency care setting.
5. Incorporate point-of-care ultrasound and clinical lessons from pediatric cases to improve diagnostic accuracy and clinical decision-making.
